RE: Olefins Panel Robust Summaries for Testing and Modeling Conducted
Under the HPV Challenge Program: C5 Noncyclics Category
HPV Registration No.

Dear Administrator Leavitt:

On September 18, 2001, the American Chemistry Council Olefins Panel (Panel) submitted a Test Plan under the High Production Volume (HPV) Chemical Challenge Program pertaining to the C5 Noncyclics Category. In the test plan, the Panel to use predictive computer models to develop relevant physical chemical properties, and environmental fate data.

With this letter, the Panel submits robust summaries for the computer modeling studies listed below:

- Calculated Boiling Point Range
- Calculated Hydrolysis (Stability in Water)
- Calculated Melting Point Range
- Calculated Partition Coefficient
- Calculated Photodegradation (Direct)
- Calculated Photodegradation (Indirect)
- Calculated Transport/Distribution (Fugacity)
- Calculated Vapor Pressure Range
- Calculated Water Solubility Range

Robust summaries for studies conducted under the HPV program for this category will be submitted in 2004. The Panel plans to submit a report on the category in 2004.
